

**PacPyro has been offered \$4.5 million  
by the Victorian State Government  
under their Sustainable Energy Pilot  
Demonstration Program**

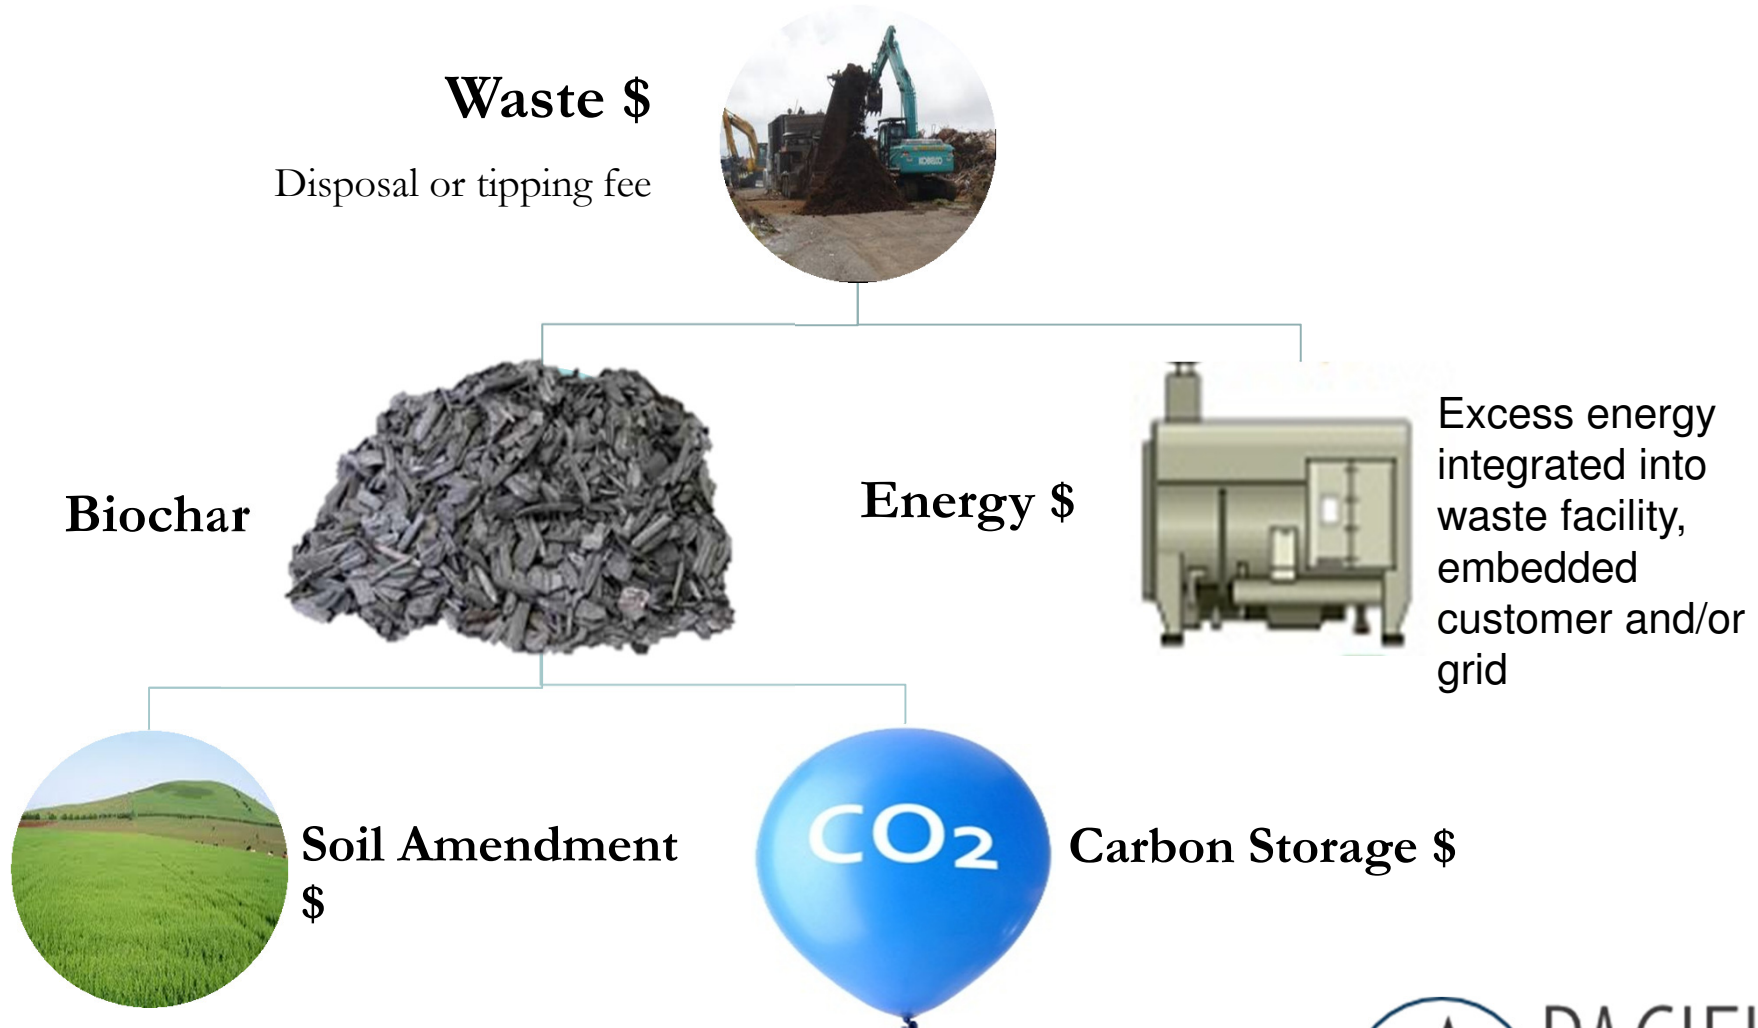

# PacPyro Commercialisation Approach

- Technology Development and Demonstration
- Product Marketability – Biochar and Bioenergy
- Lifecycle Sustainability and Risk Management
- Strategically Supported Commercial Readiness

*Project Delivery*

# PacPyro Project Value Areas

## Project Overview

- 2 tonne per hour low-value organics to biochar and bioenergy
- ~ 1MWe production, ~ 5000 tonne pa of biochar
- Piloting a range of feedstocks with a focus on urban waste organics
- Demonstrate technology and business case
- Produce biochar for R&D and market demonstration
- Generate tradeable and bankable carbon offsets
